

To whom it may concern,
I am writing this letter in regards to LPFM stations taking priority over current FM translator services, particularly K-LOVE radio potentially losing their signal.

K-LOVE radio serves me as a resident in my community by giving me a wholesome, encouraging radio station for my family to listen too. I am the father of 3 very young children, am involved in my church and community, and K-LOVE is the only station my family and most of my friends listen too, and it would be a travesty to take it off the air. It is nice to have programming my children can listen too without worrying about the content. I can allow my 10 month old son to listen to the station and not think twice about it.

The displacement of K-LOVE by an LPFM broadcaster with other programming would be equally detrimental to the communities the station serves, as most people that listen to the station are involved in their communities and support the ministries that the station supports, are involved in, and offer for the interest of the public. K-LOVE radio offers and supports a variety of ministries to the public including suicide intervention, shelters for homeless and misplaced people, programs to feed and clothe the less fortunate, to name a few of the services they provide in the interest of the public. And above all else that they offer, they are spreading the word, Love and Hope of Jesus Christ to a lost, dying world.

In our time, when the hope of our nation and culture are so hopeless for so many people, there are so many that need the voice of one crying in the wilderness.....there are so many people today that are desperately searching for something, and it is such a blessing that all they have to do is turn on K-LOVE radio, and they will find what they are looking for, the ministry of Christ that they so desperately need. It would truly be a shame if the signal of this great radio station were lost due to priority given to LPFM stations, and there would be a lot of people who may not be able to get the help they need. Please dont let these LPFM stations have priority over the translators that broadcast this fine station and leave so many without the hope and encouragement that this station provides.

Thank you, sincerely,
Leonard D Hickman
